ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

## Just Out—New DeLee's Obstetrics

Dr. DeLee's work lifts the practice of obstetrics out of the rut it has been in for years. For the first time it records all those remarkable advances made in the practice of obstetrics. For the first time it considers childbirth as a *pathologic function*—not a physiologic one. Dr. DeLee has had over twenty-one years' experience with a wealth of clinical material at one of the largest obstetric clinics in America. His deductions are based on *facts*—not theories. Dr. DeLee has subjected his work to a most severe revision. He has brought every chapter down to the time of going to press, adding much new matter and 58 new illustrations. The chapters on the Abderhalden pregnancy reaction, on "twilight sleep," on "dry labor," on labor in old primiparae, blood-pressure and extraperitoneal cesarean section he has greatly enlarged.

Prof. W. Stoeckel, Kiel, Germany

"The book deserves the greatest recognition. The text and the 913 very beautiful illustrations prove that it is written by an obstetrician of ripe experience and exceptional teaching ability."

Large octavo of 1086 pages, with 938 illustrations, 150 in colors. By JOSEPH B. DELEE, M.D., Professor of Obstetrics in the Northwestern University Medical School, Chicago.

Cloth, \$8.00 net; Half Morocco, \$9.50 net.
